Car Video, Audio and Navigation System
User manuals

In the use of this product, please read this manual and keep for future reference. To avoid any injury or accident, please read the notice of this manual in details before you install the product.
Thank you for choosing the car audio-visual navigation system of this company!
When you use this product, please read all the information attached with it, this manual is introduced all the functions of audio-visual navigation system, so that you use to facilitate the process easier. Through it, you can obtain information about products introduction, operation methods, make sure the operation is more convenience.
The display picture example of manual referenced may be a little different from the actual picture.
The display contents of this manual may be a little different with the actual content.
If any parameters change when Products continue to update and upgrade their functions, will be added to make without notice. Any problem please check the details with the agent, thank you for your support and cooperation!
The information of this manual protected by copyright, any part of it without company prior written permission is not permitted in any way to copy and photocopy. The Company reserves the final explanation about three guarantees warrant and relative information in this manual.
Safety Notes

In order to avoid any injury or property damage of the user or other persons, please be sure to read in details and abide the following notice item.

1) read the Manual
2) take good care of the Manual for future use.
3) to comply with all the warning and notice of this manual.
4) to comply with all operating instructions.
5) regarding the power supply, please refer what the manual stated.
6) the installation and wiring distribution of this product needs specialized skills and experience. To ensure safety, commissioned by professional technicians for installation and wiring.
7) there is no any parts attached with the products for user to repair and replace,please ask the professional technician with qualification of maintenance to repair and replace.
8) Do not plug any ventilation cooling vents, the local shell holes and other openings are for ventilation of heat. In order to ensure machine works stable and reliable, long service life, not to plug the hole cooling, ventilation environment must be maintained to avoid overheating the machine caused by smoking, fire or other danger.
9) heat source should be avoided and products will be not installed on local exposure to direct sunlight, high temperature areas; to be away from heat sources, such as heating, heaters, heat or have other things (including amplifiers).
10) should avoid water or moist, do not let this machine being exposed to rain or moisture in the environment (as when rain and car washing) to avoid the internal machinery of the short circuit caused the fire, electric shock or other danger.
11) before cleaning machines have to shut down power, and then wipe panel. Do not use volatile chemicals (such as gasoline or thinner) to clean panel.
12) to prevent foreign matter or liquid into the inside of the machine, do not insert the foreign body from the cooling hole or other opening into the machine. If you insert foreign bodies may cause electric shock, machine parts within a short circuit caused the fire, such as the risk of electric shock.
13) How to install the machines, do not install the unit to the truck, frame, tripod, bracket or table without the manufacturer's recommendations, should be installed on the install fittings which come with machines. When used in the car, pay more attention to firm the installation of this machine, avoid the machine falling down because of the sudden brake and resulting in personal injury.
14) Don't operate the machine in the event of rain or lightning for a long time, have to cut off the machine power.
15) Appear in the following situations, please turn off the local power supply in time, and contact with professional technician.
   a. When the power cord or plug damaged.
   b. When the machines were splashed with liquid or when the entry of foreign matter;
   c. when the machine has been rained or moisture attack;
   d. when the machine crashed from a height or as a result of abnormal operation or unreasonable damage caused.
16) LCD: do not let the machine decline to avoid LCD screen fragmentation, if so, when the outflow of liquid crystal, do not touch the liquid crystal, so as not to be harmed. Do not heat the liquid crystal display or scratching LCD with sharp objects, touch panel is also susceptible to scratching. The effective pixel of LCD screen is more than 99.99 percent, but 0.01 percent of the pixels could not be lighten normally.
17) The Manual of instructions and icons just to explain the functions, there may be a little different with actual operation, the user should follow the actual operation.

*In order to prevent accidents, avoid a possible violation of applicable
Before the operation

Do not use other function as purposes expect navigation when driving.
*In some areas, drivers or other people in car, it is illegal to watch the images of the display.

Pre-installation notes
*products of the manufacturers recommend that you do not install or repair their navigation systems by yourself. Installation and maintenance of the product may cause you in danger of electric shock or other, for all installation and maintenance operations of this navigation system please entrusted to the service personnel authorized by manufacturer.
*prohibiting use the following dangerous installing way and location:
1. when the car in a sudden stop may cause injury on the driver and passengers.
2. to avoid the possibility that impede the operation of the vehicle drivers, such as the driver front seat or the floor near the steering wheel, stick shift.
*in the dashboard panel or before open the hole from faceplate, make sure that the rear space. Be careful, not to damage the fuel cable, brake cable, electrical components, power lines or cable communications.
*in the use of screws, please ensure that they are not contact with any electrification down-lead. Vibration may have damaged wire or insulation skin and lead to a short circuit or other damage to the vehicle.
*In order to ensure proper installation, use the standard method of installation of the required components. If you use any non-standard components, this product can be internal damage or loose components, leading to damage of the Product.
*If the GPS antenna may lead to the winding column or stick shift that would be very dangerous. Please ensure that the installation of the product will not disturb driving.
*Please ensure that all leading cable will not be caught by the doors or sliding framework in the seat, so as not to cause a short circuit.
*after finish the installation of navigation systems, please check vehicles and other equipment is correct.
*some governments may prohibit or restrict to install or use of the system in the vehicle. Please comply with all the rules related to the application of laws and regulations on using, installation and operation of the navigation system
*This product will be installed in the position between the driver's seat and passenger seat in order not avoid any damage on the unit by driver and passenger when the car suddenly brake.
*Never install this product on the dashboard, door or columnation and girder, and the position the air bag expanding out and nearby. Please refer to your vehicle owner's manual to find out the area front airbags expanding
*Do not install this product on the location may prevent the vehicles, including airbags, pillows and any operating system performance.
*prevent electromagnetic interference: In order to avoid Electromagnetic interference, please try to stay away from the following components of this product, cable or other lead.
-FM, AM antenna and its lead
-GPS antenna and its lead
And you should arrange every leads to stay away from each other, not make it colligation or cross-banding together. EMI will increase the possibility of showing wrong location.

System installation
1. the installation of voltage
a. this product use for the vehicle with 12V battery and negative end.
Before the installation, check the battery voltage.
b. In order to avoid short-circuit system, installed prior to the proposed removal of the negative battery terminal.
c. can not cross the fuse of this product directly to the battery then on.
d. Do not connect this product power cord directly to other power-line circuits.

2. The installation of mainframe
a. First of all, take the original host vehicle out.
b. Remove the install bracket and screws and keep it.
c. Firm the bracket through the screws on the navigation system mainframe.
d. Fix all the cables according to the hose diagram.
e. Install the navigation system in right position and then screw the bracket of the original car to fix it well.

Note: do not damage or dirty the instrument appearances.

3. The installation of GPS antenna
To install the antenna in the inner of the car (on the rear shell), please try to make the metal plate stick on the horizontal lever so that the GPS antenna towards the window. GPS antenna will be placed on the metal plate. (GPS antenna fixed by magnetic.)

Notice: the metal plate have powerful glutinosity to leave the impress when you remove it.

Metal plate
GPS antenna
Please peel the paper at back
Please sweep the place to make sure no dust, wet, oil or dirt before you stick.

NOTE:
Paste in the metal plates, should not be cut into small pieces. Some models of vehicles does not allow glass windows GPS satellite signal penetration. At this point, the GPS antenna should be installed on the outside of the vehicle.

To install an external antenna (in the car body)
GPS antenna will be placed in a level position as far as possible, such as roof or cover suitcase Department. (By a fixed magnetic body.)
other notice.
The operation and maintenance of remote control
Do not put remote control on the dashboard, the steering wheel or sun-baked place, especially in the summer as the high temperature will lead to deformation of the remote control.
When the car stopped in the sun-baked place, the remote control should be placed on storage boxes or sunproof area. Under direct sunlight, the signal from the remote control may not be correct to receive by the machine. Therefore, please put remote control near the front panel of sensors. on the proper use of batteries if the battery used properly, due to rupture and leakage of electrolyte and cause fever, fire, injury or failure, as well as the use of pollution around the danger.
1. Please put the batteries in the remote after confirm the + and-of batteries.
2. Please use the batteries we suggested.
3. Please change the exhausted batteries in time for your better use.
4. Please take the batteries out, if you don't want to use the remote for a long time.
5. Bind up depleted batteries with adhesive tape or store them in a plastic bag for insulation in storage.
6. Never charge, short-circuit, dismantle, deform and heat the batteries or throw them into fire or water and make them contact with any metallic object
7. Never place batteries or remote control loaded with batteries in the surroundings at high temperature including an enclosed vehicle with doors and windows closed, trunk or a place in the direct sunshine and adjacent to a heater.
8. Keep batteries away from children. And sent to the hospital immediately if they swallow down any battery.

Cautions about Batteries
1. Type of Battery: lithium battery
2. Operation Life: approx. 1 year (under indoor temperature) in normal operation
3. While disposing batteries, make sure to observe the local regulations on depleted batteries.
Treatments for battery electrolyte leakage are presented below:
1. Wipe off the electrolyte residue inside the battery compartment and put in new batteries.
2. When the leaked electrolyte attaches to the human body or skin, rinse it off with water.
3. If the electrolyte enters your eyes, do not rub with hands but rinse with water and then go through the medical treatment.
Emergency Treatment:
In order to prevent life or property damages to the user or others, please immediately turn the power off and deliver it back to the nearest maintenance center or automobile stereo system dealer for assistance in the case of any foregoing abnormality.

Battery Installation
1. Take out the battery holder.
   Push and press the point A along the direction shown by the arrow and draw out the battery holder at the point B.
2. Put the battery into the battery holder.
3. Insert the battery holder back to the original place.

The DVD Disk
The DVD player can play DVD disk which have marked format as following:

dvd
audio
video
compact disc
digital video
mp3
mpeg4

DVD player can not play the disk which the region code is not compatible. (DVD player is full region code)

Before the operation

The maintenance of the DVD player
Please use the conventional circular disk, not to insert irregular, non-circular disk, otherwise these disks may be stuck inside the DVD player, or the DVD player may not correctly play.
Please check before playing on the disk if there is cracks, scratches or curly. Such discs may not play and lead to product failure. Do not use this type of disc. Using disk, do not touch the recording surface (non-printed surface)
Please put the disk in the box if it's not in use.
Please don't put the dish far away from the direct sunlight and high temperature place.
Please don't put the label, write, paint on the disk surface, or use chemicals on the disk.
Please use soft dry cloth to clean the disk from the centre to outside. the DVD player is likely to be internal components moisture if the car using central heating. The dew may cause DVD player can not work properly. So please stop the unit about 1 hour to make the unit clean and dry, if you find the fault like that. And clean the moisture on the disk with soft cloth.
The DVD may be disrupted if the car running on a bumpy road.

DVD disk

Regarding some disks, maybe can not use the some special function. Maybe can not play some disks.

DVD digital multi-functional disk
(also known as "Digital Versatile Disc" or "Digital Video Disc") is a popular optical disc storage media format. Its main uses are video and data storage. Most DVDs are of the same dimensions as compact discs (CDs) but store more than six times as much data.

DVD Menu
DVD can show couple of titles, the title menu. Besides, DVD title menu can make some kinds of items shown, the sub-menu came out during
Basic Operation

the playing, the Dolby Digital and PCM audio, caption, language changed according to the software.

While the unit play DVD-R/DVD-RW disks, it only play video format (under video mode), not play the PC files. DVD-R/DVD-RW disks recorded may not play properly due to the property of disk, scratches or dirt on disks or dew on the lens of unit. Disk recorded on personal PC maybe not worked properly, it depends on the setup and environment of the application format, therefore please use a proper format of recording.

CD-R/CD-RW Disk

The DVD player only play completed CD-R/CD-RW Disk.

CD disks recorded on personal PC recorded may not play properly due to the property of disk, scratches or dirt on disks or dew on the lens of unit. Disk recorded on personal PC maybe not worked properly, it depends on the setup and environment of the application format, therefore please use a proper format of recording.

CD-R/CD-RW maybe not worked properly under direct sunlight or being in high temperature storage place in the car.

The DVD player can not worked properly with Recorded CD-R/CD-RW Disk's title and information data. (under Audio data CD-DA)

You will wait a little long time for CD-RW Disk comparing to traditional CD or CD-R.

Please look at the notice before using CD-R/CD-RW.

Files are compatible with Id3 label Version 1.0 and Version 1.1 formats to show special editions (headers of disks), Track (Track headers) and authors (Track performers).

Only when MP3 files at the frequencies of 32, 44.1 and 48KHZ are played can enhancement function be effective (16, 22.05, 24, 32, 44.1, 48KHZ can be playable). The acoustics of MP3 files can usually be improved after the increase in bit rates. This player is able to play recorded voice at the playing bit rates of 8KBP5 to 320KBP5. In order for you to enjoy considerable acoustics, we recommend that you use the disks recorded at 128KBPS or higher.

MP3 Files (CD-ROM)

MP3 is a kind of audio compact method, which should be brought into Audio level 3 in the MPEG standard. The audio compact method has already been in the depth of personal computers as a standard mode. MP3 can compact original audio data to 10% of its initial size and to keep the voice in high quality. This means that about 10 Track Cds can be recorded on a CD-R disk or CD-RW disk. In this case, there is no need to constantly change CD disks for playing for a long time. This player allows the playing of MP3 files on CD-ROM, CD-R and CD-RW disks as well as the content of any disks compatible with ISO9660 Levels 1 and 2 and ROMEO and JOLOEY file system.

It can play the disks recorded compatible in multiple sections. MP3 files are incompatible with the transmission of data written in groups. The maximum number of characters that can be displayed as names of files is 32 characters (calculated from the first character). The maximum number that can be displayed as the name of a folder is 32 characters. If a file is recorded in the ROMEO and JOLIET file system, it can display 32 characters only. When a disk with MP3 files and audio data (CD-DA), for example, CD-EXTRA and MIXED-MODE CD, they can switch between MPEG and CD-DA to play these two types of discs. The selection sequence of playing and other folders being operated will become the writing order used by writing software. Therefore, the sequence expected by the playing time can not be in conflict with the actual playing.

However, some software permits the setup of playing sequence.

Important

When one MP3 file is named, please add the corresponding file extension name (MP3). This player will play the files with the extension name (.MP3) as MP3 files. To prevent noise and failure, please do not use such an extension name for non MP3 files.
Fast Guide for Buttons on Main Unit

[Volume control button]
Turn the button to right to increase the volume and turn to left to decrease the volume from 0-40, long press to turn on or turn off the machine.

[DVD Disk in and out button]
The player will automatically login DVD mode when you insert the disk, and automatically reject the disk if you press this button, when the player is on.

[Band Radio Button]
Press BAND to start the player and directly login radio mode when the player is off. Press BAND to login radio or switch FM1,FM2,FM3 and AM when the player is on.

[MUTE Button]
Press to switch from mute to non-mute.

[SRC Function Button]
Press this button to turn on the player and login SRC menu when the player is off. Press SRC to stitch over DVD, V-CDC, USB, Card, TV, Radio, Bluetooth, Ipod, AUX, GPS, Turn off, Key sound, Key color, Day-Night Mode, Set-up and Exit when the player is on. Press for 3 seconds to turn off the player.

[IR Receiver Port]
Do not shelter this window to avoid failure operation of the remote.

[System Setup Button]
Press this button to login system setup mode, repeating press to login Audio-Setup, Video-Setup, Usual-Setup, Touch emendation, Information, Next page, Last page, DVD logo, Test setup, Function setup, System setup and Steering wheel control setup.

[Navigation Button]
Press NAVI to turn on the player and directly login GPS mode when the player is off. Press NAVI to login GPS mode when the player is on. Press NAVI to exit the navigation function and back to the interface before when you are in the interface of navigation. Long press NAVI to setup from Normal to Multi.

[DVD Button]
Press DVD to turn on the player and directly login DVD mode when the player is off. Press DVD to login DVD menu when player in on.

[Reviver Button]
Press this button to receive the coming call under the Bluetooth function.

[Hang Up Button]
Press this button to finish the calling under the Bluetooth interface.

[System Reset Button]
Press this button return to factory setup.

[Power Button]
Long press this button to turn on the player when the player is off; Long press this button to turn off the player when the player is on.

[Display Angle decrease Button]
Press this button decrease the display angle. (This button is of no effect with the fixed panel model.)

[Display Angle increase Button]
Press this button increase the display angle. (This button is of no effect with the fixed panel model)

[Lcd Panel in and out Button]
Press this button to control the LCD panel shrink. (This button just effect with the one din model)
**Basic Operation**

**Description of Buttons on Remote Control**

1. **Power Button**: Press this button to turn on the player when the player is off; press this button to turn off the player when the player is on.
2. **Display Angle Minus Button**: This button is of no effect with the fixed panel model.
3. **Display Angle Increase Button**: This button is of no effect with the fixed panel model.
4. **LCD Panel in and out Button**: This button just effect with the one din model.
5. **Day/Night Mode Button**: Short press to switch the Day Mode and the Night Mode.
6. **Image Mode Button**: Short press this button for different image mode setup, brightness, contrast, hue from 0-40.
7. **Picture in Picture Button**: Short press to display picture in picture function interface.
8. **Audio Setup Button**: Short press for individual Audio setup.
9. **DVD Button**: Short press to login DVD player.
10. **Direction Button**: Up
11. **SRC Player Button**: Press this button for the main menu.
12. **Direction Button**: To left
13. **Direction Button**: To right
14. **Confirm Button**
15. **Navigation Button**: Short press enter the interface of GPS; long press exit GPS.
16. **Direction Button**: Down
17. **Radio Button**: Short press enter the radio function; short press consecutive to switch FM1, FM2, FM3 and AM.
18. **Receive Button**: In the interface of Bluetooth, after match with the mobile phone, press this button to receive incoming call.
19. **Hang Up Button**: In the interface of Bluetooth, after match with the mobile phone, press this button to finish the calling.
20. **Main Menu Button**: This menu is the second grade menu, touch this button to pause when it's playing and enter the interface for choosing the segment, it lists all the content of the disk, you can choose the segment that you want by yourself.
21. **Eject Button**: The disk come out after press this button.
22. **Play/Pause Button**: Put the disk in and press it then start to play, and press the key again to stop playing.
23. **Stop Button**: Press this button to stop playing.
24. **Information Button**: Short press this button to display the information like the title and sequence number of segment about the playing
program.
25.[Last Song] Short press one time for repeat playing the current song, short press twice return to last song.
26.[Next Song] Short press to play next song.
29.[System Setup Button] Short press to enter the system setup.
30.[Volume - Button] Short press to decrease the volume.
31.[Volume Augment Button] Short press to augment the volume.
32.[Mute Button] Short press for switch Mute and non-mute.
33.[Number Button] Number from 0-10.

Operation for Turn on and Turn off the player
Short press the SRC button on front panel of the player or the remote control when the player is off state; Long press the button of SRC to turn off the player when the player is on.

The Main Menu
When the player is power on, short press the button of SRC on panel or on remote control to enter the main menu, same as follow:

There are 17 function buttons on the main menu, same as follow:

[DVD] Using high-definition color digital panel, with high resolution 800 x480, it's performed very well both in color saturation, color and color revert, and in response, and the color is more high fidelity when in video and GPS navigation. The unit can play the disk of DVD/VCD/CD/MP3/MPEG/CD-R/WMA/JPEG format.
[V-CDC] Access the disk music file to the memorizer of the unit through the DVD player, the capability of the memorizer can keep playing for 7.5 hours, that nearly same as the time as playing six ordinary disks.
[USB] After connect with USB equipment, touch the USB icon to play the file, can play WMV/AVI/MPEG/MP3/MP4/JPEG format of file.
[Card] After insert the SD card, touch the SD icon to play the file, can play WMV/AVI/MPEG/MP3/MP4/JPEG format of file.
[TV] Touch the icon enter the TV function with the TV signal, can support the CMMB, DVB-T, DMB-TH.
[Radio] Touch the icon enter the radio function, more sensitive digital frequency with stronger and more steady signal, can storage 32 station of AM/FM.
[Bluetooth] DVD unit supply Bluetooth for hand free call function, if your mobile phone with Bluetooth function, it can connect to DVD unit realize hands free call.

Under main menu, press this button to login virtual CD driver as following picture. Please check the function of button as following:

- Real disk icon
- Favorite
- Mute, switch from mute to non-mute
- Voice adjust
- Backward
- Forward
- Previous
- Next
- Random playing
- Cycle playing
- Play/Stop
- Delete
- Normal compress
- Rapid compress

Setting:
1. Inject the CD disk under virtual CD driver. The system will change to virtual CD driver menu;
2. Copy the CD file to virtual CD driver, please use normal compress or rapid compress;
3. When the virtual CD playing, the file can be played or deleted by control button;
4. If the virtual CD driver cannot compress by reason of song compressing problem, please login preference page of setup menu to press 1"8"5"0", then login USB format menu. There are tips during and after formatting.

USB setting

The file to play in the USB, insert the USB equipment to the USB slot correctly, the unit login USB menu automatically, playing menu as following, touch USB blank menu to show button.

It's same function and setting as DVD menu. The unit support hot-plugging.

Picture capture to be DVD starting logo function

The function workable only connecting to USB and SD, reading picture or mp4. The picture format is JPG, resolution from 720*500 to 1M.
1. When you see your favorite picture or mp4, press stop, then the picture stop as following picture.
2. Press next page, login setting menu 2, as following picture.
3. press , then press enter into the DVD menu interface, it shows as the following:

Touch the opening menu, this menu will appear a sub-menu, choose user image and close the DVD menu settings (touch ).

4. Touch , captured function will be paused by the system.

When wait capture logo disappear, the current capture picture is successful finished.

SD setting
The file to play in the SD, insert the SD card to the SD slot correctly, the unit login SD menu automatically, playing menu as following, touch SD blank menu to show button. It's same function and setting as USB function. The unit support hot-plugging.

TV setting
You can choose analog TV or DVB-T in your unit.

Analog TV setting
Touch TV icon in main menu login TV mode, the menu as following:

Button function and setting as following:

- Volume adjust and mute switch.
- Setting button, press this button login setting menu, to set the image system companion system, setting as following:

Image system: press to choose your own TV system, the image are: AL/NTSC/SECAM/PAL-M/PAL-N.
Basic Operation

Companion system: press < or > to choose your own companion system, companion are: BG/DK/M/N. there are different companion system relevant to its image system.

Image system: NTSC/PAL-M; companion system is M.
Image system: SECAM companion system is BG/DK
Image system: PAL-N companion system is N

Button to precious channel.
Button to next channel
Frequency button, press this button to show keyboard, with it to input frequency.
Search button, press this button starting to search TV channel, the menu as following picture:

The unit will store searched channel, as most as 100 channel. The unit stop search if touch the panel, the unit show No.1 channel after it's ready. The unit can store 100 channel mostly, if the receiving effect is not good, please check if the tv antenna have been connected well. As the low signal or drive fast, the tv receiving effect is not well, it's normal, not the unit problem.

Channel button, press this button to show channel keyboard, input the channel number to watch your love channel.

DVB-T (optional)
Touch TV icon in main menu login TV mode, the menu as following:

Button function and setting:
- Up, down, left, right button, confirm button.
- Volume adjust and mute switch.
- Multi-functional color button: press corresponding button according to the screen shows to act function.
- DVB-T: program channel directory, press this button to show...
program's channel. Time and date, also can show the booking program.

Press this button to show keyboard, press keyboard to choose channel.

Back, back to previous program.

Favorite, login or quit your favorite channel program list, switch by channel +/-.

Channel info button, login or quit info of DVB-T program.

Menu button, login or quit menu setting.

Info button, view program information.

Quit button, quit current setting, back to previous setting.

Channel search button

The screen shows No Channel as following, when first time login DVB-T.

Please set the search mode and country system first. Press menu button to login menu setting. The screen shows four icons, installation, system, channel list, preferences. Press to choose icon, the chosen icon become big and light as following picture.

Press or button to login next menu, press button back to main menu, press button quit menu, press or button more up and down to choose menu, then press to confirm.

Country and area

Please choose the country or area by installation menu. The default is England. After login installation menu, press or button to show country and area list, press or button to choose your country.

Search automatically

Press or button to choose auto search function, then press button to login auto search menu to search automatically, it takes some minutes to search the channel.

The notice before navigation operation
First please confirm the correct connection of satellite antenna. On one period after you turn on the radio, the satellite antenna will receive satellite signal, update the inside messages and works as normal after

.23.
Basic Operation

Please make sure all the vehicle position is not under bridge or on the tunnel or near high building so that affect the receiving of signal. Drivers should finish the DVD setting in advance, or should messengers handle the operation of DVD. Save operation is the important thing to guarantee drivers, messengers and other people on safety. This product is easily to be operated through the touch screen, touch key or remote control, the details operation method is decided by the media entertainment host.

MAP

Because of the fast developing of city or country traffic roads construction, the traffic management information of city streets and traffic establishment changes very often. The GPS Software Company will keep updating the e-maps, please check the update information from GPS Software Company in time. The guiding routes may be different with the live traffic control status because of the traffic rules changes or temporary traffic control. Please drive according to the actual roads status, traffic controls and rules.

Navigation

Due to the some changes happen on the real time roads traffic sometimes, the navigation routes the system guided only for driver's reference. For example: when driver is familiar with the area, it is better that driver choose the routes he is familiar instead of the routes navigation system offered.

TEMPERATURE

The normal working temperature range is from -10°C to +55°C, if the temperature is over to this range, the radio could not work as normal. Please try to get the temperature back to normal working range, so that the radio can work as normal.

ANTI-SHOCK

This product was designed to be anti-shock, when you drives as usual the radio was not affected by the shaking of the car. To make sure the products in use for a long time as normal, do not turn on the radio when you drives in bad roads situation.

SATELLITE SIGNAL RECEIVING

This system can always receive at least 8 satellite signals. Usually, if only receive 3 or 4 satellite signals, the navigation system can calculate the correct position of vehicle. But sometimes when you meet some bad weather or the vehicle parking in the high building. This situation will affect the signal receiving result.

ABOUT ERROR

When the system receive satellite signal as normal, the standard satellite orientation system wrap is about 7 miles, when vehicle drives in the parallel roads, there is still error although the navigation system amend the error automatically. Even it will show the vehicle position is not in the right road but on the other parallel road nearby.

Main Function

A. GPS Navigation function: Provide SD card with GPS software by users.

C. Video Player: Support more than 19 kinds of format like mp4/mpeg/mpg/asf/wmv/mov/avi/3gp3g2/k3g/m4v/mjpg/mpg/ogm/wvx/mlv/mpv. Support appending and deleting files, adjust the rate of progress, time display, pause, full-screen display.

D. Digital Book: Text read for TXT format. User can enter the page No. to choose the page freely.

E. Picture Browse: Support the format like bmp, jpg, gif, png for picture browse. Support picture blowup, dwindle and lantern slide display.

F. Setup: Including GPS Navigation set, GPS monitor set, common use set, emendation for touch screen and system set. Basal setting is for language, time, skin, switch effect, volume and keystroke tone.

2. Touch Screen

A. Click one time: Click the screen one time.

B. Click two times: Click the screen two times fast.

C. Drag: Clicked and then drag.
